Tempo Runs- begin with 5-10 mins of gentle jogging, gradually accelerate and run 5-10 mins at your peak speed, then decelerate to a gentle jog to finish.
Intervals- The pace at which you run—plus the rest interval in between—needs to be CONSISTENT. Pick a pace during the first rep that you can maintain for all the reps. If your run intervals become slower or you find you need more rest to recover, then you are doing them incorrectly. CONSISTENCEY IS KEY!

Fartleks- Fartlek is a Swedish word that means "speed play." After 5 or 10 minutes of gentle jogging at the start, pick up the pace and surge for maybe 10 or 20 or more seconds, then jog or even walk for a near equal time until partly recovered, then surge again. These speed bursts could be anywhere from 100 to 400 meters, or longer.

Long Runs- Can be done on Sunday's rather than Saturday's. Are necessary to improve endurance. Should run at a conversational pace
Rest/Easy Days- Must run them easy or risk injury and overtraining.
